7. **Finish protection:** Go Industries have a high quality finish that must be cared for periodically (every 30 days), like any other exposed finish on the vehicle. Protect the finish with a non-abrasive automotive wax (pure carnuba) on a regular basis. The use of cleaner wax or any compound that contains an abrasives detrimental as the compound will scratch the finish and open it to corrosion.

Caution:

Lower hood carefully, make sure there is clearance for the hood to close. Damage could occur if hood is closed onto Grille Guard. Note: Grille Guard can be adjusted for clearance by loosening top and bottom bracket. Push bottom of grille guard in and tighten bottom bracket first, then top bracket.
